

## Turning Entertaining Inside Out

Issue? - Imagine a rainy and windy Sunday in July, you've invited the family over for a lunchtime barbie, only to find the rain clouds have come over and the wind has come up.

Or on a hot Saturday afternoon in January when you're expecting friends for an early dinner and thoughts run through your mind that your friends may be cooked by the sun, before you've finished cooking the snags!

Solution - Have you ever wondered how great it would be to have family or friends over for a barbeque no matter what the weather report is saying? Sublime Shutters & Blinds Aluminium Plantation Shutters are just the trick to create an inside entertaining area... outside!

Sublime's external marine grade Aluminium Shutters allow you to have the freedom to entertain when it suits you. Having the functionality to be able to adjust louvers to open to allow airflow to pass through. When the breeze comes up or sun gets too hot, effortlessly close the louvers to allow them to act as a break against the elements.

Our unique range of Aluminium shutters offer a softer, sleeker look than most commercial grade solutions and allow for a seamless transition from inside to out. Sublime's Aluminium shutters are perfectly suited to provide the perfect mix of light, airflow and temperature control to make the most of utilising any outdoor area no matter the weather.
